

Mentor/Mentee Activities

In addition to structured discussions, you and your mentor may choose to focus on activities that will assist you in your personal and professional development.

Below is a list of suggestions if one or both parties decide to add an activity to their mentorship.

Activities to Consider:

- Resume Review
 - Bring a copy of your current resume. Work with your mentor and your team to provide suggestions for improvement.
- Mock Interview
 - Ask your mentor to provide you with a mock job interview. Each member should take turns doing this so plan enough time so each can take a turn or plan separate meetings with your mentor.
- Shadowing Day
 - Spend a day with your mentor. Attend meetings and other activities to better understand a day in the life of your mentor.
- Attend a Trade Show
 - If possible, consider going to a trade show with your mentor. Get a chance to see a variety of industry specific organizations and/or the general process for networking
- Tour a Forging Plant
 - The Forging Foundation can set up a plant tour with one of our members in your area to see firsthand how one of their facilities functions.
