

About Us

Xena Workwear was founded by a female engineer who loved her work in the manufacturing industry but was frustrated with the lack of professional work boot options for women. She knew that a more versatile category of workwear was needed and decided to shake-up the stagnant industry of manufacturers who did not understand or care about women's needs.

Our Safety Shoes

All of our footwear is ASTM certified and designed based on the needs of women working in manufacturing, construction, and other demanding industries.
